PROFILE

Mathematics graduate with client-facing Business Intelligence experience in commercial reporting, customer segmentation and data quality. Uses Power BI, DAX and SQL to turn business requirements into dashboards and validated metrics. Statistical research experience in R, with work spanning commercial analytics, climate data and educational research.

PROFESSIONAL EXPERIENCE

Business Intelligence Intern | PKF Attest, Spain | Sep 2024–Jan 2025

676 hours; extended by the firm. Clients: Weleda, Inncome and FAES Farma.
Concluded to begin a mandatory, fixed-schedule placement for the concurrent Primary Education degree.

- Delivered a Power BI sales dashboard for Weleda, from client requirements to billing and customer-quality views, enabling sales users to review revenue and customer performance.
- Calculated DAX measures for gross/net billing, YTD and year-on-year changes, customer activity, average invoice value, credit notes and top-10 customer concentration; enabled comparisons by product, channel, region and salesperson.
- Calculated quartile-based RFM customer segments and used colours and icons to highlight key, loyal, at-risk and inactive customers. Helped configure security roles to restrict sales users' access.
- Resolved duplicate records behind Inncome billing discrepancies across MySQL and Navision sources: combined and cleaned data in Power Query with supervisor approval; resulting totals matched client estimates and were confirmed in a review meeting.
- Queried and joined SQL source tables, then modelled one-to-many relationships between billing and date, customer, product and salesperson tables in Power BI.
- Worked with SQL Server stored procedures, query optimisation, SSIS, Azure Data Factory and multidimensional models. Maintained client reports, documented issues, presented dashboards and supported business users.

TECHNICAL SKILLS

BI and data engineering: Power BI, DAX, Power Query, SQL Server, MySQL, Excel, data modelling, KPI reporting, RFM segmentation, data validation, ETL, SSIS, Azure Data Factory, OLAP.

Statistics and programming: R, Python, JASP, regression, hypothesis testing, stratified sampling and bootstrap methods. Academic tools: MATLAB, GAMS, Java and C.

Supporting tools: Git, Word, PowerPoint and Canva. Additional coursework: Tableau and Snowflake. SAP Analytics Cloud learning in progress.

EDUCATION

Universidad Rey Juan Carlos | Concurrent double-degree programme | 2020–2026

Bachelor of Science (BSc) in Mathematics — 240 ECTS.

Bachelor's Degree in Primary Education — 240 ECTS.

PROJECTS

Climate Trends in Spain and Southern Europe | PKF Attest | Published 2025

- Sourced, prepared and analysed AEMET/NOAA temperature and precipitation data covering 1973–2023; developed Power BI visualisations to compare geographical and temporal patterns.
- Produced detailed and executive reports under senior supervision during the internship. This analysis contributed to PKF Attest's published Climate 2025 report.

www.pkf-attest.es/tecnologia/en/novedades-itc/informe-clima-2025-datos-power-bi/

Gamification and Popularity of Educational Mathematics Apps | BSc Thesis | 2026

- Prepared Google Play data in R: filtered 2.3 million records to 4,218 relevant apps and analysed a stratified sample of 200.
- Compared two regression models using diagnostics, HC3 robust standard errors, sensitivity analysis and 1,000 bootstrap resamples; interpreted associations with estimated downloads while distinguishing popularity from educational effectiveness.

Research and code | URJC: hdl.handle.net/10115/414797

Mathematical Flexibility in Primary Education | Bachelor's Thesis | 2026

- Designed three mathematics games and a five-session study; selected a stratified sample of 15 from a class of 22 and collected paired assessments and 270 rubric-based observations.
- Applied descriptive statistics and the Wilcoxon signed-rank test in JASP alongside thematic analysis. Observed improved scores in 13 participants; reported measurement limitations and the constraints of a single-group design.

Case study and results | URJC: hdl.handle.net/10115/428077

CERTIFICATIONS AND TRAINING

Google Data Analytics Professional Certificate — Google / Coursera | Jul 2026
Python for Data Science, AI & Development — IBM / Coursera | Aug 2026
Version Control with Git — Atlassian / Coursera | Aug 2026
Data Warehousing Workshop, Badge 1 — Snowflake | Sep 2026

ADDITIONAL EXPERIENCE

Mathematics and Science Tutor | Part-time | 2021–2026

Outbox academy (2021–2023): 10 hours/week. Private tutoring (2023–2026): more than 10 students. Prepared tailored materials, explained complex concepts and adapted sessions to learning needs.

Primary Education Teaching Placements | 2025–2026

CEIP Blas de Otero, grade 4: Spain 9.8/10; Swiss estimate 5.9/6.
CEIP Juan Ocaña, grade 5: Spain 9.6/10; Swiss estimate 5.8/6.
